MicroW L Bendable 1,5 mm

Temperature recording device from -40°C to 250°C (calibration from 25°C to 140°C, above 140°C the probe only resists) with 30 cm bendable probe and 2 mm diameter, managed with Windows software and USB interface (DiskInterface HS, Multibay). Battery is user replaceable and the data logger is provided with an Accredia (NIST equivalent) traceable cetificate on 6 points.

Note: if used below -30°C, battery life will be highly reduced.

Main features

- With bendable cable to place the device near the packages instead on top and with rigid probe for penetration (first and last 30 mm cannot be bent)
- Completely food grade and waterproof
- All software calculate lethality value (F0, PU, A0 ecc.)
- Low battery consumption for an extended battery life
- User replaceable battery (software shows battery status)
- Very easy to deploy in any type of package
- Accredia (NIST equivalent) traceable calibration certificate included
- Available extended calibration from -40°C to 250°C (order extra calibration points; in case of wide calibration range the accuracy might be worse. Request the possible calibration ranges in advance)

Plus

- Extremely high accuracy and precision: with an accuracy of ± 0,1°C these devices can be employed in any application involving food&beverages, pharmaceuticals, validation, laboratory and medical field
- High accuracy even outside the calibration range
- The response time is faster with the 1,5 mm diameter probe
- Easy to use even in small and narrow places thanks to the bendable probe
- Printed reports compliant with health regulations and ISO (data are not editable in the software)
