

Rotator

Rotator software allows to program and download data from the Rotator logger for rotation and temperature up to 125°C monitoring. Software gives the possibility to set acquisition rate and duration of the mission. Once data are downloaded they are shown in graph and excel exportable table, along with a rotating 3D model.

Main features

- Rotator logger management
- Moving 3D model (manual and automatic) according to the acquisitions
- Data exported to excel

Accessories

- DiskInterface HS

Technical specifications

Operating systems	Windows 10, 11 (32, 64 bit)
Data loggers supported	Rotator
Data management	Every mission is saved in a single file
Data display	Graph, table, 3D model rotation simulation
Customizable parameters	Acquisition step, mission duration
Languages	English
